Isatu B. Conteh

(240) 425-7625 | iconteh21@yahoo.com | https://www.isaconteh.com | Github: Freetown5

A newly minted full-stack web developer with a background in design and merchandising and rudimentary user experience, specifically information architecture skills. Comfortable working in both collaborative and independent environments.

Skills:

Front-end: HTML 5/CSS 3, Javascript, JQuery, Backbone.js

Back-end: Ruby on Rails, SQL(Postgres), Sinatra

Design: Adobe Photoshop, Illustrator, Indesign and Acrobat, Google Sketchup

Basic Computing: CLI(Command Line), Git/Github

Education:

General Assembly- Web Development Immersive Program 2015

- Project- TechLeap: A web app (created with other General Assembly students on behalf of USA
 Today) to attract future tech workers by showing them how their current skill set can translate into new
 job opportunities. It Includes an interactive quiz, a results section and example stories. Can be viewed
 at: http://learntech.herokuapp.com/
- Project- CoverCreate: A web app that functions as a cover letter template that job seekers can use to create cover letters for their job applications by simply filling in relevant company, job and contact information: Can be viewed at: https://covercreate.herokuapp.com/

Drexel University- Bachelor of Science in Design and Merchandising 2011

Web Development and Design Experience:

Women Who Code- Currently serve as front-end hacknight study group lead. This normally consists of directing attendees towards learning resources for HTML/CSS and Javascript as well as contributing to resources on WWCDC's Github repository and occasionally teaching classes to attendees of First-timers night for beginners.

D.C. Science Hack Day- Created in collaboration with 5 other students/team members. It won the Science Hack Day Policy Award and is being picked up by Amazon Web services, with plans to present to real policy makers in the near future.

 Project- Policonnect: A web site designed to help policy makers and experts communicate with each other on certain topics with less red tape while still keeping their anonymity. Can be viewed at http://www.policonnect.org/

Code for Crittenton- participated in a competition to build a website for a project associated with the Crittenton Services of the Greater Washington D.C area. Final design received a 100% score for design and 90% score for functionality.

 Project- Talk With A Teen Girl: Single page, static web app created to encourage mentorship of young women in the Washington D.C. metro area (not live, still can be viewed on online portfolio)

OnTap Magazine- Designed layouts for multiple pages of the August edition of the magazine using mainly Adobe InDesign

Related Work Experience:

Drexel University Monell Office- Edited images, compiled pdfs using Adobe Acrobat, typed and collated documents as well as other administrative tasks
